6.Pips model 均衡分析 (基本图关系推导) 2020112921 刘欣豪

$$s = \frac{v}{4.47}l + l$$

己知:
$$k_j = \frac{L}{l}, k = \frac{L}{s}$$

$$\mathbb{E}\mathbb{P}: \quad \frac{k_j}{k} = \frac{v}{4.47} + 1$$

整理得:

$$v = 4.47(\frac{k_j}{k} - 1)$$
